Dear Colleagues

Tool Factories Association Czech Republic

It is with immense pleasure that we congratulate SVAS NASTROJAREN on behalf of the Worldwide Tooling Industry on its 25th Anniversary.

The Czech team and specifically our good friend Vaclav Klicka have continuously been contributing ambassadors promoting the pivotal importance of the Tool, Mould and Die industry to the viability and sustainability of the manufacturing sector.

In recent years we have all experienced significant challenges which have reinforced the importance of both establishing and maintaining reliable supply chains. In this regard the Czech Republic Tooling Association has been active in defending the interests of its own TDM sector whilst promoting the understanding internationally that a strong and vibrant manufacturing economy requires the ongoing support of an equally dynamic and technically competent Tooling industry.

The very success of ISTMA World is dependent on its ability to create the platforms on which its member associations can network and share innovative developments. The ever-present participation of our Czech republic colleagues has been an inspiration to us all.

We look forward to greeting you personally at the ISTMA World Conference 2023 in Cape Town South Africa and the continuation of our excellent working relationship promoting the mission of helping national tooling associations and their member companies achieve business success in the global economy through advocacy, networking, information programs and services.

Kind Regards
